DETAILED ACTION

Reasons for Allowance

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Claim 1 is allowable because the prior art of record does not teach or fairly suggest an interference suppression filter and lightning current diverter device wherein each line comprising at one end a first contact element for providing electrical connection to an inner conductor and at the other end a second contact element for providing electrical connection to the housing wherein; the second contact elements of the two lines are connected to different parts of the housing.
4. Ammann (PCT/CH01/00617) discloses a surge protection filter wherein each line comprising at one end a first contact element for providing electrical connection to an inner conductor and at the other end a second contact element for providing electrical connection to the housing. However, Applicant has amended Claim 1 to included the limitation "the second contact elements of the two lines are connected to different parts of the housing" on page 3 of the Amendment filed 3/14/2006. As stated in the arguments, this new limitation overcomes the Ammann reference as it teaches that the

second ends of the each conductor are coupled to the screw (17), which is the same part of the housing.

5. Claims 2-20 are allowable as they depend from Claim 1, which is also allowable.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
